

ExpoLight™

An ExpoDisplays Product

what a bright idea!

ExpoLight™

With large, fully backlit graphics, ExpoLight maximizes graphics display area and stands out on the show floor compared to conventional trade show displays.

LED LIGHTING

The new, improved ExpoLight brings all of efficiencies of LED lighting to our bestselling light box. It's energy efficient, has a longer lifespan, and puts off minimal heat.

DOUBLE SIDED LIGHTING CAPABILITY

We've re-engineered the location of the lighting. This means ExpoLight is now available as a dual sided unit making it perfect for a free standing, impactful display.

MODULAR FUNCTIONALITY

You can also combine ExpoLight with other products to add big, backlit graphics to an existing display, use ExpoLight in quantity for a greater impact or use one light box as a freestanding unit. Pre-designed kits make the choices simple.

REENGINEERED FOR SIMPLICITY

With 30% fewer parts, the new ExpoLight is more light weight and is as sleek internally as it is externally. Fewer pieces = faster set up time and lighter weight.

EASY TO ASSEMBLE

No tools are required to assemble this lightweight frame. One frame goes together in minutes with detailed, color-coded labeling of each part. The graphics are simply applied with magnets.
